

## Octane Plus

### Description

Octane Plus is a self-mixing combination of agents formulated according to state-of-the-art additive and fuel technology. Octane Plus is for universal use and increases the research octane number (RON) of the fuel by 2-4 points, depending on the RON. Thanks to the increased performance of the fuel, engine damage caused by knocking combustion is prevented. The increase of the octane number ensures low fuel consumption.

### Properties

- improves performance
- increases the octane number
- prevents engine damage caused by knocking combustion

### Technical data

Color / appearance	brown, clear
Base	additives, naphtha
Density at 59 °F	0,817 g/cm <sup>3</sup>
Flash point	145 °F
Pour point	-49 °F
Viscosity at 104 °F	< 7,0 mm <sup>2</sup> /s
Odor	characteristic
Form	liquid

### Areas of application

For increasing the octane number of gasoline. Minimum fuel filling of 25 liters (7 gal.) is requested for optimum product performance.

**For racing use only. Not street legal.**

### Application

One 150 ml can is sufficient for 50 liters (13 gal.) gasoline. Increases the RON by up to 4 points. Pour Octane Plus into the fuel tank and then top up with fuel. Mixing takes place automatically. **Note:** Do not store the product at temperatures > 39 °C (102 °F) for extended periods!

**Our information is based on thorough research and may be considered reliable, although not legally binding.**
