

Rim Cleaner

Description

Special cleaner with practical dirt indicator. For intensive and gentle cleaning of aluminum and steel rims. Easily removes brake abrasion as well as other dirt. Reduces the amount of stubborn dirt that returns and, when used regularly, guarantees a radiant shine and long service life of the rims. pH neutral to the skin.

Properties

- excellent cleaning effect
- pH-neutral to skin
- gentle cleaning
- very powerful wetting effect
- suitable for aluminum and steel rims

Technical data

Odor	characteristic
Base	surfactants
Form	liquid
Density at 20 °C	1,09 g/cm ³
Color / appearance	yellow
pH value	7-8

Areas of application

For all rim designs. Do not use on repainted rims.

Application

1. Evenly spray Special Rim Cleaner on the dirty rims. Note for the 1 l spray bottle: If the trigger is pulled quickly it emits a wide and flat spray pattern, while pulling it slowly results in a concentrated spray pattern. 2. Allow to act for 5 – 7 min. depending on the degree of contamination, but do not allow to dry. 3. For removing very stubborn dirt, rework with a sponge or brush. 4. The cleaning process can be checked visually by watching for a change of color; the optimum effect is achieved when completely purple. 5. Thoroughly rinse the rims with a high-pressure cleaner. Note: Do not use on hot rims or in direct sunlight! Test material compatibility on sensitive surfaces in an inconspicuous place before applying!

Available pack sizes

1 l Spray bottle plastic	21533 F-GB-ARAB
1 l Bottle plastic	23017 GB-F-D-I-NL-ARAB
1 l Bottle plastic	23057 E-P-H-RO-TR-GR
